Library Book Loan System Risk Management Report

| Risk forecasted in planning | How it was handled/mitigated |
|------------------------------------|--|
| Missing delivery | To handle this risk, we tried to finish out tasks 2 days before the delivery date. |
| Software design complexity | To handle this risk, we planned to show a tutorial when a member log into the system for the first time. |
| Specification breakdown | To handle this risk, we started to plan and manage the software at the very beginning of the project. |

| Risk not forecasted in planning | How it was handled/mitigated |
|--|---|
| Miscommunication between team members | We meet right after the previous submit and make a plan of the new tasks to handle that risk. |
